DETAILED ACTION

Drawings

1. The drawings are objected to because the cross-hatching provided in the drawings is incorrect. The seal body is cross-hatched as if it were made of metal, rather than an elastomeric material, as claimed. All elements in a section view must be crosshatched according to the material they are made of, as per the standards found in MPEP 608.02 IX. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Application/Control Number: 10/580,344

Art Unit: 3676

Claims 5-13 are objected to under 37 CFR 1.75(c) as being in improper form
because a multiple dependent claim cannot depend from any other multiple dependent
claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated
on the merits.

Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims appear to be a direct translation from a foreign language, and contain awkward grammar which makes it difficult to ascertain the meaning of the claims. For example, "the first through opening (6) is disposed in a wall (9)" is unclear because opening 6 is not really *in* wall 9. Wall 9 is basically attached to opening element 6 which has a wall that forms an opening. The claim makes it sound as if there is a hole through wall 9, which is not the case.

There are also numerous antecedent basis issues in the claims, where claim elements are never positively introduced. For example, in claim 1, "the middle", "the one part", and "the other part" are not positively introduced.

In line 16, the limitation "in the manner of an eye" is indefinite, because it is unclear exactly how the opening 6 moves like an eye.

The claims are being examined as best understood by the examiner.

Art Unit: 3676

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

 Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamada et al. (US 6,297,457).

As best understood by the examiner, Yamada discloses the claimed seal in Figs. 4-6. See Exhibit A, attached to this Office Action for a detailed explanation. Note that, with respect to claim 4, the collar can be turned outward, as shown in Fig. 4 of Yamada.

Conclusion

- 7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references provide further examples of shaft seals with "under-gripping" lips. Examiner has also attached copies of the foreign documents cited in the IDS filed May 25, 2006.
- Any inquiry concerning this communication or earlier communications from the
 examiner should be directed to ROBERT E. FULLER whose telephone number is
 (571)272-6300. The examiner can normally be reached on Monday thru Friday from
 8:00 AM 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David J. Bagnell can be reached on 571-272-6999. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
